* If Γ is not a π -group, we follow Page [1980] and assume that the only irreducible Γ -module is \mathbb{F}_p .

* If the 10-point Likert or Guttman Scale for HUS SPAC is less than 70, enter 70.

^a The logarithm of the probability that the first two digits are 09 is 6.87.

The first condition of Proposition 1.3.1 of [1] that is independent of the largest number listed in the application is on ϵ , since ϵ

For $\alpha \in \mathbb{R}$, $\alpha \neq 0$, we consider the function $\phi_\alpha: \mathbb{R}^2 \rightarrow \mathbb{R}$ defined by $\phi_\alpha(x, y) = \alpha(x^2 + y^2)$. The infimum of ϕ_α and the optimum value of ϕ_α are both 0, the set of optimum points is $\{(0, 0)\}$, and the set of optimum points is $\{(0, 0)\}$. The function ϕ_α is not strictly convex, but it is strictly concave. The function ϕ_α is not strictly concave, but it is strictly convex.
